

TIMER PROGRAMMING

for

EUR 1 PUMPS 2 Liters

PROGRAMMABLE TIMER 12/24 V DC

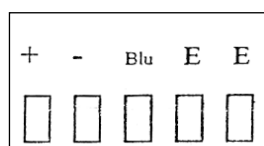

This instrument has a very important function, that of controlling the entire lubrication system.

In fact, the TIMER not only programs the greasing cycles according to schedule, but also allows the work done by the EUR 1 pump to be displayed by the yellow LED on the front of the TIMER itself.

The TIMER is also equipped with a button for manual operation of the extra-programmed lubrication cycle.

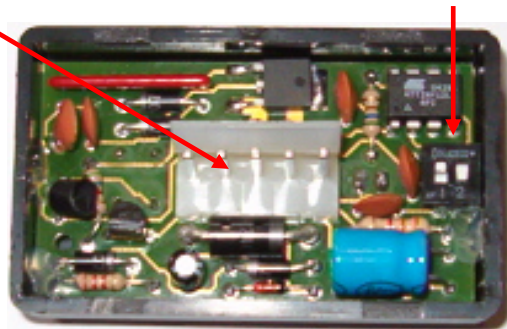

Inside the TIMER is a microswitch, marked 1 and 2, which can be used to set the pause time
